Your genially works offline 🤩

It may seem like magic, but the option to download your genially as HTML allows you to view or present your genially offline. Yes, really!

The interactivity and animation will work without an internet connection.

> **Important:** External content like YouTube videos, Google Maps, or social media posts **do** require an internet connection in order to be displayed.

How to use it

To view your genially, open the **genially.html** file by double-clicking on it and you're all set!

> Remember to always **keep all files and folders included in the .zip file in the same folder** to make sure your genially continues to work as it should.
